Know theory, methods and practice within one or more academic fields

Understand and reflect upon theories, methods and practice

Use methods and tools of one or more academic fields and to use general skills connected to employment within the academic field/s

Assess theoretical and practical problems and use relevant analysis and solution models

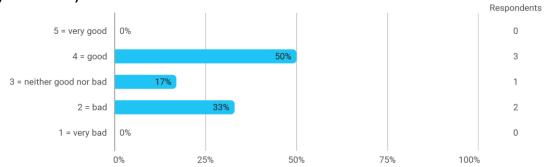

Communicate academic problems and solution models to both academic colleagues and nonspecialists

Handle complex and development oriented situations in a study- or work related context.

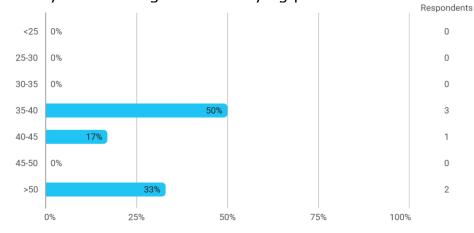

Independently enter into academic and crossdisciplinary cooperation with a professional approach

Identify own learning needs and structure own learning in different learning environments

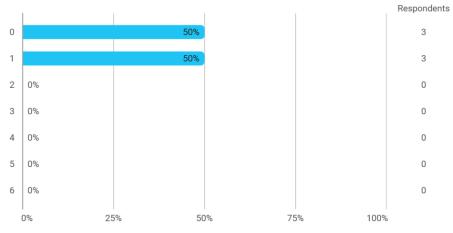

## 9. How has your study load been?

10. How many hours have you in average been studying per week?

11. How many semester projects have you done in collaboration with external partners?

12. During your bachelor's programme, how many hours a week have you in average been working in a paid job and/or doing voluntary work?
